1) The homepage/landing page it would more interesting if it were a bit less symmetrical so maybe if you made one of the pizzas smaller and then the title ("Neapolitan Pizza") even bigger and pushed it over a bit to fill the new space

Bullet points so they're colored and that could be a nice touch. also maybe could try coloring the headers but if that looks too much then don't, I'll leave that up to you

otherwise I don't have any complaints I LOVE the ingredients page and the "best of napolitana" page looks awesome
